OUR VISION

We strive to provide our customers with absolute satisfaction by supplying them with quality products in the most eco-friendly and sustainable manner by cohering to the basics of the environment and societal welfare.

ABOUT US

DYNAMIC ENTERPRISES is one of the leading and fastest growing Polymer Based Water Storage Solutions companies in Eastern India. The company manufactures a comprehensive range of water tanks to support a wide range of client base throughout eastern India. We aim at providing an innovative and sustainable solution to preserve and store the most precious resource water.

The water tanks manufactured by Pranish are made using 100% Virgin Food Grade powder to meet the highest quality standards as desired by our valued customers. Pranish not only maintains a very attractive and aesthetic appearance but also makes use of advanced UV & Anti-Microbial compounds to keep the water absolutely pure and fresh. We also have an exclusive range of polyethylene foam tanks that acts as an excellent insulator and keeps

water cool, thus making it the perfect choice for our customers.

Our highly advanced products adhering to stringent quality control mechanisms and produced under the supervision of our well-trained and seasoned employees makes our tanks the right choice. Our speedy growth is a testament of the unwavering faith bestowed upon us by our valued customers.

Staying true to our core values has helped us create a company we're proud to run and work for and our focus on making the best products possible has brought us speedy success in the marketplace. The company intends to further expand its infrastructural base in eastern India thereby exploring newer horizons.

PRODUCT FEATURES

FOOD GRADE

Food grade plastic makes the water tank safe for storing drinking water, even for long duration.

VIRGIN MATERIAL

Virgin material means pure plastic, thus no bad smell of plastic will come from the water stored.

ANTI-MICROBIAL

Resists the growth of germs, bacteria and algae inside the tank.

WEATHER PROOF

Use of advanced UV and anti-oxidant material on the outer layer protects the tank from sunlight and changing weather.

UNBREAKABLE TESTED DESIGN

Mould designs are tested via advanced software thus eliminating any risks of crack development in tank.

LONG LASTING COLOUR

Use of premium quality colours protects the tank from colour fading.

SAVES ENERGY

Insulation layers reduce the heating & cooling of water, maintaining difference of nearly 15-18°C. The insulation ensures that lesser energy is utilized for cooling or heating up the water.

EXTRA STORAGE

Our tanks in all variants provide 15% extra storage space free of cost, thereby making it a highly desirable choice.

STRONGER

Extra muscular ribs have been incorporated to add strength to the tank. It reduces bulging when the tank is full, and also reduces chances of bursting under pressure.

KEEPS WATER FRESH

Threaded lid design with air-tight features keeps water fresh for a much longer time and this minimizes cleaning maintenance cost of your tank.

OUR PRODUCTS | INTERNATIONAL RANGE

2 LAYER* 21 kgs

It is most economical means of storing water in a healthy and safe manner. The outer Black layer protects the tank from the harmful UV rays of the sun and the Inner layer keeps the water free from germs. The aqua color improves the visibility inside the tank.

-  Outer HQ Carbon Black Layer
- 2nd Anti-Microbial Food Grade Ultra White Layer

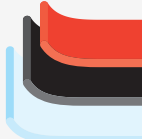

* Available in Black & Royal Blue

3 LAYER 26 kgs

15% Extra⁺

It is one of the most widely desired storage solution variants. The middle black LLDPE layer in addition to the outer virgin colour layer and inner sky blue layer makes it one of the highly demanded tanks.

-  Outer UV Stabilised Outer Layer
- 2nd HQ Carbon Black Layer
- 3rd Anti-Microbial Food Grade Ultra White Layer

4 LAYER 30 kgs

15% Extra⁺

It is part of the premium series of water storage solutions offered by the Pranish Group. The tank is highly admired in the market for its quality, strength, durability and competitive price.

-  Outer UV Stabilised Outer Layer
- 2nd HQ Carbon Black Layer
- 3rd UV Stabilised Blue Layer
- 4th Anti-Microbial Food Grade Ultra White Layer

Colours Available

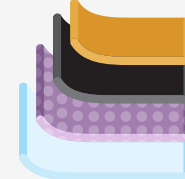

*These tanks can carry 15% extra water than the stated capacity

4 LAYER PUFF 34 kgs

15% Extra⁺

It is one of the most exclusive options and latest additions for domestic & industrial applications. The insulated layer of foam along with triple polymer layer keeps the water cool and safe even in extreme temperatures of 45-50°C. This advanced technology available at an optimum price, makes this tank truly value for money.

-  Outer UV Stabilised Outer Layer
- 2nd HQ Carbon Black Layer
- 3rd HQ PE Insulated Foam layer
- 4th Anti-Microbial Food Grade Ultra White Layer

5 LAYER 37 kgs

15% Extra⁺

It is one of the most durable options to store water. The five layers with dual carbon black layers renders the tank immune to harmful UV-rays. This heavy-weight tank is undoubtedly one of the most premium and durable products in the market.

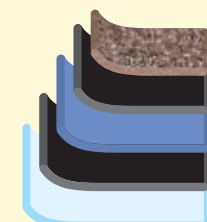

-  Outer UV Stabilised Outer Layer
- 2nd HQ Carbon Black Layer
- 3rd HQ PE Insulated Foam Layer
- 4th HQ Carbon Black Layer
- 5th Anti-Microbial Food Grade Ultra White Layer

5 LAYER MARBLE* 37 kgs

15% Extra⁺

It is the flagship product of our wide range, made from advanced grade polymer, the five layer marble tank is "Unbreakable" and one of its kind with 25 year Guarantee. More of an asset than a tank, the unique marble shades available make it highly attractive and appealing to highest aesthetic standards, with its long and durable life.

-  Outer Unbreakable UV Stabilised Marble Layer
- 2nd HQ Carbon Black Layer
- 3rd UV Stabilised Blue Layer
- 4th HQ Carbon Black Layer
- 5th Anti-Microbial Food Grade Ultra White Layer

-  Unbreakable
-  Aesthetic Design
-  Advanced Technology Virgin Polymer
-  High Performance Additives

*Available in 2 attractive colors
